“A truly customer-centric approach, however, is still a foreign concept to many retailers because they **lack an integrated view of first-party customer data across channels**. The result is subpar execution of frictionless omnichannel commerce and an experience that isn’t especially personalized to the customer. “

GOOGLE RESEARCH SMARTER RETAIL IN HONG KONG

TOP REASONS FOR PURCHASING ONLINE

Source: Google/Ipsos, "Smarter Digital City 2.0 Research," 2018

RETAIL MARKETERS CAN DRIVE TRAFFIC AND REVENUES IN 3 WAYS

1. Meet customers online, where they already are.

 **79%**
have smartphones

 **98%**
go online at least once daily

 **86%**
research online before buying

Retail marketers need to digitize to:

- Offer more relevant product information
- Extend the brand/product experience
- Improve cross-selling opportunities

2. Become digitally accessible and relevant.

SMBs need to keep up with ever-evolving consumer expectations

Have at least a website or an app that is highly visible to search engines

Employ more advanced technologies, like machine learning, to understand customer behaviors

Create a strong e-commerce experience for consumers

Only 17%

of Hong Kong SMB retailers use e-commerce

3. Bridge the gap between offline and online.

Hong Kong retailers need to invest in O2O (online-to-offline) to:

- Create seamless retail experiences regardless of channel

6 in 10 luxury consumers expect the same experience across channels

- Shorten decision cycles and remove uncertainty in product choice and availability

- Create fresh ways to engage consumers, such as:

On-the-spot coupons

Shop-and-collect schemes (alleviating logistics constraints)

Create immersive and personalized in-store experience

Providing guidance using mobile
