Introduction

5G network is a crucial element to smart cities. While the Government strives to build Hong Kong into a world-class smart city, how should we adapt into this future smart city with 5G? This symposium provides keynote information for those who interested in 5G development and smart city development.

Symposium Highlights

- Presentation of the Research Report on 5G IoT Application
- 5G Potential for Smart City Applications
- Hidden Concerns of a 5G Smart City
- Business Opportunities in the 5G Era and Smart City
- Panel Discussion for Audience to Raise Questions and Views
