Information

# Exhibition Introduction

**Duration:** 10 August 2022 to 12 August 2022 (3 days)

**Venue:** I.C.E. Hanoi

**Collaborating Organisations:**

- The Chinese Manufacturers' Association of Hong Kong
- Hong Kong Federation of Innovation Technologies and Manufacturing Industries Limited
- Hong Kong Young Industrialists Council Limited
- Hong Kong Commerce & Industry Associations Limited
- Hong Kong Electronics Industry Council, Group 5 of Federation of Hong Kong Industries
- The Hong Kong Association for the Advancement of Science and Technology Limited
- Hong Kong (SME) Economic and Trade Promotional Association Limited
- Hong Kong Entrepreneurs Association Limited

**Implementation Agents:**

**Exhibit Contents**

1. Intelligent communication network system
2. Smart transportation, ports
3. Smart community, home
4. Smart wearable devices, AR/VR
5. IoT Information Security
6. Smart Medical, Health
7. Other areas of IoT

The fair is the leading exhibition for industrial machinery and technologies. It was held for the first time in 2008. The organizer is Reed Tradex, the leading exhibition organizer in ASEAN. Reed Tradex is a member of Reed Exhibitions, the world's leading exhibition organizer, which runs high-profile, targeted campaigns that bring together buyers and suppliers to discuss business. In addition, the exhibition is supported by the Ministry of Industry and Trade (MOIT) and the Ministry of Industry and Trade (DOIT) of Vietnam.

The Vietnam Manufacturing Expo provides an ideal platform for nearly 200 brands from almost 20 countries to showcase their state-of-the-art machinery and technologies under the theme "Smart Factory of the Future". The 2019 report shows that more than 11,000 trade buyers from 44 countries visited the show and more than 200 machinery and technology brands from 20 countries participated in the exhibition. The exhibition is an interactive venue that encourages attendees to discover the cutting edge of smart manufacturing solutions including IoT technologies, products and solutions by introducing the implementation equipment, software and solutions of smart factories that play an important role in Industry 4.0 technology.

# Floor Plan

The Hanoi International Center for Exhibition - ICE Hanoi, located in the heart of downtown Hanoi. It is well equipped with all types of facilities which helps in successfully organizing any big or small national and international events, seminars, shows etc. It has the open space which enables displaying of products and booth designing to be highly accentuated by the target groups.

Venue address: I.C.E. Hanoi, 94 Tran Quoc Toan Tran Hung Dao Street, Hoan Kiem District Hanoi

## Introduction of Hong Kong Pavilion

Information and communication technology not only plays an important role in promoting the vigorous development of Hong Kong's economy, but also gradually develops into an industry. The Hong Kong Special Administrative Region Government's "Hong Kong Smart City Blueprint" and related measures have been successively implemented to gradually build Hong Kong into a world-class smart city. Due to the geographical and cultural similarity between Hong Kong and mainland China, Hong Kong has a vibrant entrepreneurial ecology and environment, coupled with the continuous development of smart technologies such as the Internet of Things, artificial intelligence, and data analytics, which have given Hong Kong a competitive economy and huge potential.

To further promote the Industrial Internet of Things (IIoT) in Hong Kong, the IOT HK Association and the Hong Kong Productivity Council have successfully obtained funding from the Hong Kong Special Administrative Region Government's "Special Fund for Brand Development, Upgrading, Transformation and Expansion of the Domestic Market (Institutional Support Scheme)." Developing the industrial IoT market in mainland China through a multi-layered promotion plan". This plan includes participating in the three major industrial IoT trade shows in the mainland, setting up a "Hong Kong Pavilion", and arranging business contacts so that local companies offering IIoT hardware, software, complete solutions, etc. can tap into the mainland market.

### Advantages of developing IoT in Hong Kong

1. Have an international vision and continue to introduce new foreign trends.
2. Based on the nationally planned center of the Greater Bay Area, the surrounding area has great development potential.
3. There are complete machinery construction facilities and a mature supply chain.
4. There are abundant resources to cooperate with the research and development projects of various universities, and there is an endless stream of innovation power.

## Hong Kong Pavilion 3D image

# IOT HK Association

The members of "IOT HK Association" are mainly SMEs in various industries in Hong Kong. The association aims to promote and publicize SMEs in Hong Kong by leveraging the application layer of the Internet of Things to improve business productivity and open up new business opportunities.

Through "IOT HK Association", members increase the opportunities of communication with various industries and increase the opportunities of collaboration.

In addition, members can increase their business opportunities and productivity by discussing and sharing various application areas and using the IoT application layer. For example: how to use the results of Big Data analytics to provide feedback and carry out effective management and control over production resource allocation and business development, etc.

The association will also hold various lectures, seminars and exhibitions to improve SMEs' and enterprises' understanding of the IoT application layer, communicate and cooperate with each other to make various industries use the IoT application layer to improve technology, support transformation and expand business.

# Smart Logistics Gateway for E-Commerce in Hong Kong and Asia

## Diversified Delivery Solutions

- Best logistics matching
- From door-to-door to international shipment
- Real-time courier fee quotation

## Full Scale API Plug-in

- Turn-key plugin for E-Commerce platform
- Single unified logistics API for E-Commerce platform to integrate

## Service Offerings

### Automated Operations

- Place shipment order
- Waybill printing & tracking
- Rate quotation
- Order management

### Warehouse & Stock Management

- Connecting warehouse
- One-stop real-time inventory management
- Pick-n-pack service

## Pricing Scheme

- Free service to merchants
- No setup fee
- No subscription fee
- Only settle shipping fee with ShipAny

\*\*Please contact us if you want to bring own courier account

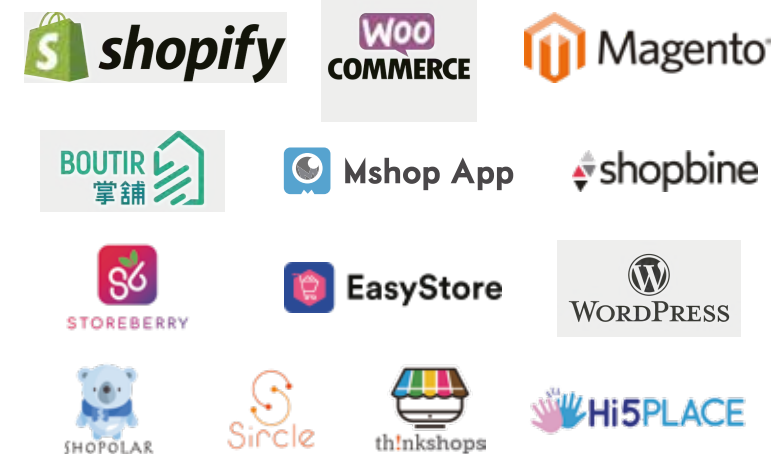

Scan to watch our introduction

## Fuel Your Growth in 1-Click

- Real-time Tracking
- Match Right Logistics
- Real-time Courier Fee Quotation
- Higher Delivery Fulfillment

- Save Manual Work
- Self-Register
- Single Billing
- Instant Connect eShop

## E-Commerce Partners

## Logistics Partners

## Milestones

- 2019**
  - Product Launch
  - Release of SF Express Support
- 2020**
  - Reach Daily High 5,000 Orders
  - Release of Shopify Support
  - Platform Intergration with Boutir
  - Fully SaaS Model
- 2021**
  - Hong Kong ICT Gold Award
  - Platform Intergration with HSBC
  - Reach 2,000 E-Commerce Merchants
- 2022**
  - Hong Kong Outbound International Shipment Service
  - Instant On-Demand 7/24 Delivery
  - 3,000+ E-Commerce Merchants
  - 18+ Logistics Partners
  - 12+ E-Commerce Platform

# A Blockchain Based Technology and Consulting Company

區塊鏈技術及顧問公司

Blockchain Solutions provides unrivaled blockchain technology solutions and applications to our clients, transforming their business model by building and revolutionary solutions. Our service brings enhanced transparency, security, and efficiency to client's business and help our clients to build, govern, and grow their business across industries and regions. We believe this disruptive technology will shape how businesses operate in the coming decade.

區塊鏈技術提供最新區塊鏈技術應用與改革性商業解決方案，並提供度身訂造的一站式解決方案。區塊鏈科技具有不可篡改、可追溯及安全的特質令它能揉合不同行業及業務，並發展出前所未見的營商模式。透過此技術，我們為不同行業及地區的客戶帶來高透明度、效率及安全的一站式解決方案，我們相信區塊鏈將會顛覆現有的營商及生活模式。

# COMPANY PROFILE

eSIX is a networking edge computing technology company focused on Industrial high-speed networks. Its patented technologies enable the bi-directional supervision and control of remote machines and networks. eSIX provides fast, flexible, and easy-to-deploy solutions, especially in the 5G mobile network environment in which the vehicles are in high-speed moving. Successful cases include unmanned truck management in one of the top 10 large ports, monitoring and control of train and public transportation, factory and industrial automation requirements, etc. The company was founded by a team of enthusiastic entrepreneurs, data scientists, network engineers, etc., aiming to remove the barriers of global networks, and connect everything easily with our cutting-edge networking technologies.

## Our Core Technology: IP Fiber

### Major Features:

- ① IPFiber has L2 Overlay technology. It can emulate a great layer2 network over conventional wired or 5G network.
- ② Inter-protocol penetration, IPFiber can transmit data via ethernet protocol network for both non ethernet protocol sites.
- ③ IPFiber can create multi virtual tunnels for each application in order to ensure the performance & security for key business.
- ④ IPFiber makes multi virtual tunnels can be rapid failover via Multi-WAN. Compare with conventional VPN which spends from couple to dozens of seconds to do failover via Multi-WAN, IPFiber can accelerate failover time to 10ms grade.
- ⑤ IPFiber can perform Multi-WAN aggregation. Gathering multi-WAN with different ISPs as one WAN improve WAN I/O performance and reliability.

# TAKE YOUR BUSINESS TO THE NEXT LEVEL

**AppTask**  
Limited

## INTERNET OF THINGS (IOT)

AppTask is dedicated to the design, implementation, and deployment of end-to-end IoT solutions. Our solution comprised of hardware devices such as sensors, actuators along with integrated cloud-based

frontend/backend platforms which carried KPI dashboard, data analytic reports, alert notification, etc. in the forms of web client and mobile app.

## SMART OFFICE SOLUTION

Monitor, analyze and generate reports of the office area in different aspects.

### Indoor Environmental Quality Monitoring:

- ▲ Air quality measurement & alert
- ▲ Smart temperature analytics
- ▲ Energy consumptions analytics
- ▲ Noise measurement & analysis
- ▲ Smart lighting control for energy saving

### Guest Toilet Smart Mirror Solution Highlight:

- ▲ Visual presentation of all maintained items
- ▲ Report broken items by screen touching
- ▲ Real-time alerts and reports to management
- ▲ Promptly arrange for repair
- ▲ Streamline daily reporting process
- ▲ Advertisement and promotion display

### We Can Help You:

- ▲ Integrate your Smart Sensor with our Mobile App & Web Portal SDK
- ▲ Fast and low cost development
- ▲ Extensive workflow functionalities to maximize your sensors' capabilities
- ▲ Customize UI branding for your various customers

# A Digital Transformation Application Platform

## What is ReportNOW?

ReportNOW is a Digital Transformation Platform that helps any organisation to rapidly and accurately transform its business process digitally. With ReportNOW's state-of-the-art technology and tons of practical functionalities, users can quickly digitalize the current processes with our simple and user-friendly No-Code platform and quickly improve the mobility of their task force. Hundreds of enterprises have already adopted ReportNOW in their operations and have successfully transcended thousands of existing processes through digital transformation.

## Why ReportNOW?

ReportNOW, in fact is designed for great ease of use with simple installation. It is flexible, scalable and suitable for a wide range of industries. Most importantly, it helps to boost your productivity and competitiveness by speeding up the information process and smoothening the business workflow without additional investment to acquire new hardware while enjoying these benefits.

## MANUFACTURING CLOUD SOLUTION

Focuses on the pain points of production management and supports enterprises transforming to intelligent manufacturing with cloud-native environment, reducing operating costs, and developing core competitive advantages.

Enquiry  
+852 2157 9390

### Production requirements align with sales forecasts

Kingdee cloud manufacturing enables close collaboration between organizations by establishing a centralized industry 4.0 planning model for businesses. Material purchasing, production schedule, capacity calculation, outsourcing networks, etc., can be integrated into one system, allowing enterprise to make the right decisions with a transparent production.

### Full traceability

Quality control and data recording is available throughout the entire process, from raw material to the finished product; a complete quality documentary and traceability system enables precise tracking for post-sales service and data support for quality improvement.

### Master manufacturing cost-accounting

Mapping out the standard costs and actual costs; the system can help accurately calculating variable costs in the intelligent manufacturing processes and provide supporting data for product development and planning.

### Fully control the budget

Incorporating ERPs' advanced concept in manufacturing management, as well as JIT and lean-production concepts, the system provides a effective oversight of subcontractor management process including subcontract planning, supply of materials and sourcing, third party inspections, product warehousing cost accounting, etc.

### PLM product optimization and digitalization

Standardise and control the materials in the creation process. Everyone in the corporate is involved in the material management and inventory control which can solve the problem of overstocking. Also it can prevent the material becoming inactive due to multiple codes happened in the traditional ERP, this will reduce inventory costs.

### MES management of production sites

IOT integration, hardware and software integration, traditional barcodes and scanners can speed up data entry and the inspection process. With new smart terminals and intelligent terminal controls at production sites, the system deeply integrates with IT and Operational technology, breaking the barriers between the information system and underlying systems and underlying equipments, which improves the overall efficiency.

## Muscle & Fat Z2

**The seamless way to accurately measure your body fat and explore your muscles in an ultrasound-powered targeted way.**

Marvoto Muscle & Fat Z2 leverages cutting-edge ultrasound technology to provide an instant and extremely accurate measurement of fat accumulation and muscle condition in localized parts of the body. Choose the manual or automatic mode, swipe it, and have your subcutaneous fat and muscle thickness instantly measured with all the precision you could ever hope to find.

You'll like to know that Marvoto Muscle & Fat Z2 does not just measure and provide ultrasound images of your fat or muscle volume. It also allows you to store all the collected data and visualize it through the App at any time, providing muscle fat analysis reports for each part of the body and records the change curve of body muscle fat. This way, you can accurately and seamlessly monitor your weight-loss or muscle volume growth process.

# kNOW Touch

## Contactless Elevator Control System

**kNOW Touch** is an infrared sensor application for providing a touchless button interface. It helps reduce the risk of spreading bacteria caused by the finger touching the buttons.

**90 deg version**  
(mounted on adjacent wall)

**0 deg version**  
(mounted on the panel)

### How does it work?

Simply by fitting the infrared sensor near the elevator operating panel, kNOW Touch allows passengers to safely select their destination floor by hovering their finger over the elevator button from a close distance.

### Features:

- Zero contact for safety and hygiene
- To avoid false triggering, kNOW Touch can detect and ignore object size beyond allowable limit
- Easy installation without the need of vast mechanical alteration to perform
- Compatible with almost all kinds of elevator models

**sleekflow**

## Sell, convert & support better on social

Centralized messaging platform to deliver great customer experience.

### INBOX

#### Conversion through conversations

Combine all your messaging channels into one & work together efficiently across teams with quick replies & internal notes.

### AUTOMATION

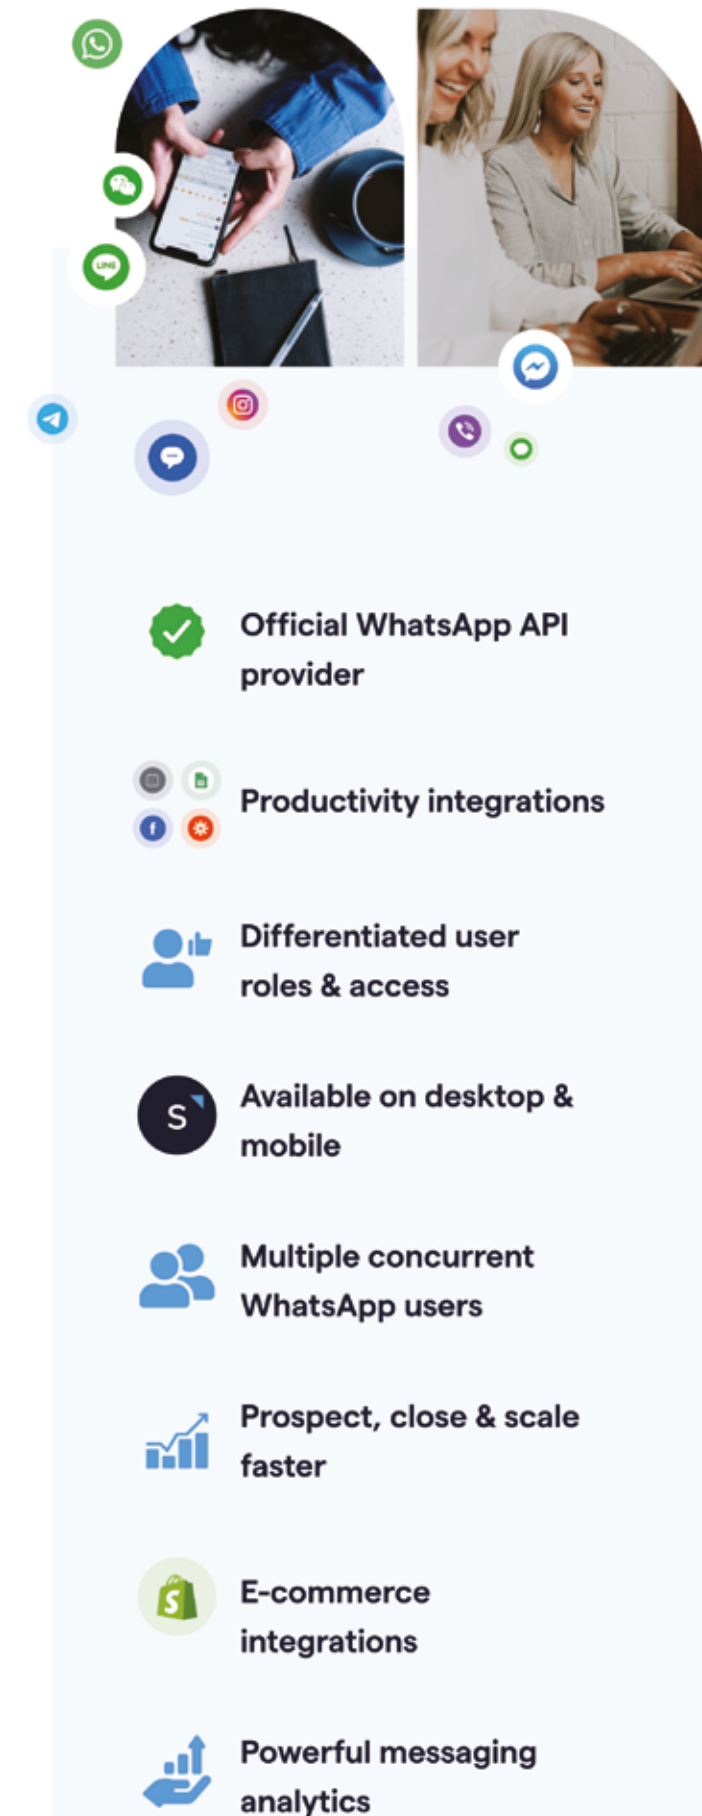

#### Automate sales workflows

Use a chatbot to route leads, answer queries and map your customer engagement journey with drip campaigns & abandoned cart texts

### CAMPAIGN

#### Broadcast marketing campaign

Segment, filter and label clients based on purchase behavior to send targeted campaigns on all channels and tracks real-time statistics.

**Sensors**

**WI-FI**

Low monthly  
From \$3.99

**EQUIPEMNT**

Record equipments  
quantity and last location

**VALUABLE ASSETS**

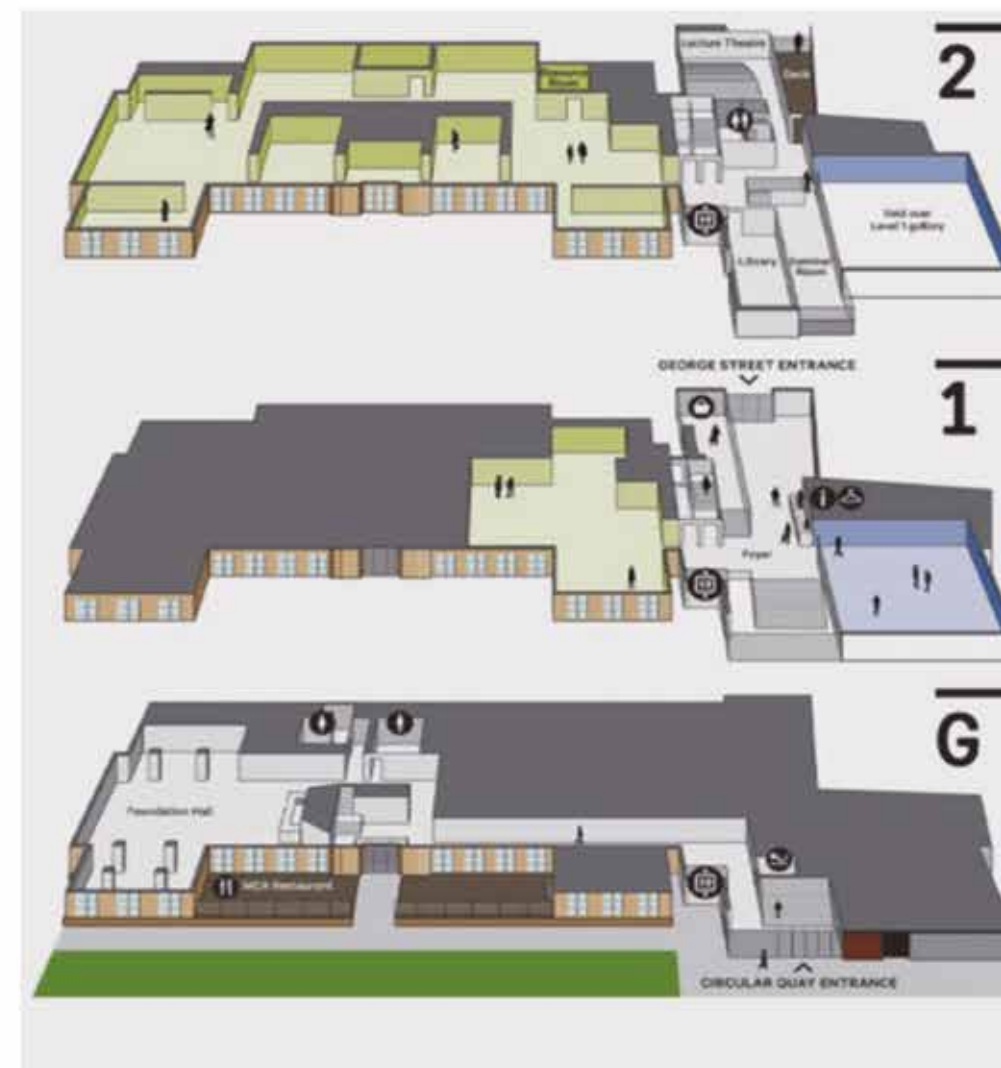

Realtime location of assets  
alert when movement

**REALTIME  
MONITORING**

Retime monitoring, auto  
alert when equipment and  
assets our of area

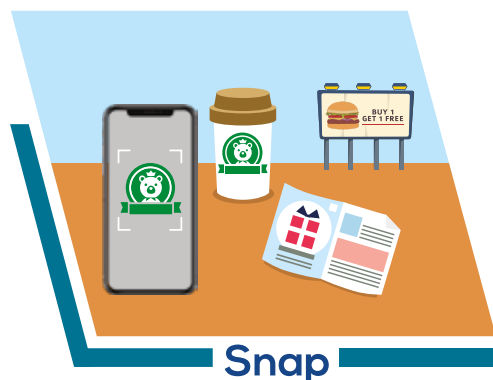

Self map upload  
Patrol management  
Door access management  
Temperature monitoring  
Staff Duty monitoring  
Foolding monitoring

# How **AR** can supercharge your marketing, promotion and events

## SnapPop for Promotion

Easy access of promotion information everywhere

Easy to call for action

Analytics drive for future promotions

### On-site

Take selfie and interact with the super star.

### AR Business card

Snap the business card to get more content and CEO AR message

### The First Hong Kong Virtual Sales Platform

Accelerate your business growth by developing a scalable and sustainable virtual sales network with us now

#### Awards

The member company of Incu-Tech Programme, HKSTP  
CityU HKTECH300  
Digital Transformation of the Year Award 2022  
Bright Future SME's Youth Creative Entrepreneurship Award 2022  
Vietnam Startup Wheel 2022 - Top 50 International Track

- Develop virtual sales forces anywhere
- Connect sales professionals from HK instantly

### What we do

To assist corporations to connect more brick-and-mortar salespeople through social content sharing, and to help them build larger sales alliances in a more cost-effective way, aim to increase sales opportunities and create a revolutionizing B2B sales ecosystem - the First Hong Kong Virtual Sales Platform.

**Mr. Raymond Mak**  
Founder

### How to develop your virtual sales network

Setup products profile and reward schemes.

Share your product profile to social media like Facebook, WhatsApp, LinkedIn, etc.

The more you share, the larger sales alliance network you can build.

#### Other features:

1. Private Messaging with salespeople
2. Switching salespeople at zero cost
3. Handling sales orders and commissions, etc.
4. Product listing for sales engagement
5. Track number of sales connected and sales opportunities generated
6. Monitor content sharing activities
